

# Healthy Pets Need a Clean Clinic

Control microorganisms in the clinic.  
Sanitize by applying a simple chlorine bleach solution.\*

1. **Wash** surface with hot, soapy water to clean.
2. Thoroughly **Rinse** off soap.
3. **Sanitize** with a chlorine bleach solution (~1,000 ppm); leave wet for 10 minutes.
4. **Rinse** and **Dry**.

Bleach solution should be made fresh daily because bleach breaks down over time.  
In outbreak situations higher concentrations may be needed.
