

# Healthy Pets Need a Clean Shelter

Control germs in the shelter.  
Sanitize by applying a simple chlorine bleach solution.\*

**1/4  
CUP  
BLEACH**

+

**1  
GALLON  
WATER**

- 1. Wash** surface with hot, soapy water to clean.
2. Thoroughly **Rinse** off soap.
- 3. Sanitize** with a chlorine bleach solution (~1,000 ppm); leave wet for 10 minutes.
- 4. Rinse** and **Dry**.

Bleach solution should be made fresh daily because bleach breaks down over time.  
In outbreak situations higher concentrations may be needed.
